Microsoft Skills
Git & GitHub
Bash
Linux User (1+ year)
Generative AI Prompting

PROJECTS

e-Yantra Robotics Hackathon

2025

- Building code for a line-following robot under C and Python.
- Testing the code by launching the bot in CoppeliaSim and testing different training methods like RIL.

Semester - II Project

March 2025 - June 2025

- A GUI for new Linux users to easily access files instead of running commands under the terminal
- Easily executes supported versions of files (.py, .c, .jpeg, .png, etc..) in the same application which reduces dependency on other applications.
- Easy and simple UI to reduce stress on new users of Linux of remembering shortcuts, commands.
